## EXPERIENCE

### General Assembly

#### Web Development Immersive

October 2015–January 2016

Dungeons and Dragons Character Generator - app for newcomers to DnD to create new characters quickly and easily.

- Made a character generator which can be used to make any base character in Dnd with a MEAN stack.
- Used AngularJS to render the page dynamically with partials as they selected different options.
- Stored characters in a Mongo database using Mongoose to create schemas that were flexible where needed.

Attendance Tracker - web app for tracking attendance

- Created full-stack application with Ruby on Rails.
- Used sendgrid and twilio API to have the app send and receive texts and emails with tracking.
- Styled the with interactive charts with ChartJS

Delivery Database - wiki style forum for delivery drivers

- Made a forum for delivery workers to post and receive tips for different buildings with Ruby with Sinatra.
- Implemented database with PostgreSQL.

Goat Simon - Simon style game with screaming goats

- Created pattern game using HTML, CSS, and Javascript.
- Implemented ability to save high scores using JQuery.
